

O₂ Pure

Portable Oxygen Inhalers

All Portable Oxygen Inhalers are supplied with a choice of oxygen cylinders and five different regulators packed in a rectangular case with carry handles, shoulder strap and storage pockets. Included in all kits are two oxygen therapy non-re-breathing masks (child and adult) MTM resuscitation masks, tubing and cylinder key.

O₂ Pure

Portable Oxygen Inhalers

The **Portable Oxygen Inhaler Kits** are supplied with a choice of regulators and cylinders. There are five different types of regulators, all of which have an oxygen pin index cylinder connection and contents gauge.

The choice of regulators are fixed flow outlet – 4, 5 and 6 litre per minute, a multiflow regulator with 13 settings of 0 – 15 litres per minute and a multiflow regulator with 13 settings of 0 – 5 litres per minute, both regulators have low flows for children.

Each kit is supplied with a 2.0 litre WC x 200 bar WP aluminium oxygen cylinder as standard, fitted with a pin index cylinder valve giving approximately 400 litres of oxygen.

Other cylinders can be supplied on request, please ask for details.

Also included in the **Portable Oxygen Inhaler Kit**:

- 2 disposable therapy non-re-breathing masks and tubing (adult and child)
- 1 MTM resuscitation mask with oxygen inlet port and tubing in a hard case
- 1 cylinder key for key type pin index cylinder valves

The **Portable Oxygen Inhaler** is packed ready for use in a rectangular case with carry handles, shoulder strap and storage pockets as standard. Other bags or cases are available, please ask for details.
